

Name: _____ Date: _____

Directions:

In the book **Let's Go Rock Collecting** you learned all about rocks! Test your knowledge below. Match the word to the definition. Write the correct letter on the line next to the word.

A. a clear kind of rock that has a regular shape, like a diamond

B. having to do with rocks formed by a volcano or other source of great heat

C. a loose mixture of small stones, pebbles, and sometimes sand

D. a steady force upon a surface

E. an opening in the earth's crust through which melted rock, ash, and gases are forced out

F. a gathering of a group of things of the same type

___ **collection**

___ **layer**

___ **grainy**

___ **igneous**

___ **magma**

___ **lava**

___ **volcano**

___ **sediments**

___ **crystal**

___ **gravel**

___ **metamorphic**

___ **pressure**

G. a section of something that alternates with a different material from top to bottom

H. having grains or a texture resembling grains

I. hot, liquid matter beneath the earth's surface that cools to form igneous rock

J. hot, melted rock that erupts from a volcano

K. solid material that settles to the bottom of a liquid; in geology, material deposited by water, wind, or ice

L. having to do with a change in form
